You have two options for scoring an SSP an examinee has completed. You can choose to have the tests auto-scored and have the report automatically emailed to you. This will automatically deduct a scoring credit from your count. Or you leave AUTO-SCORE off and go into your administration page and select which examinees you wish to score and generate a report for. With AUTO-SCORE OFF a scoring credit will only be deducted at the time you score the examinee.

Enable/disable Auto Score option: Allow Auto Score

We recommend you leave AUTO-SCORE turned OFF. If you click it on, any applicant that takes the test will automatically be scored, and a scoring count will be deducted; even though you may not have decided whether you want to evaluate their test.
